

Peter Lemiszki

Experience

Software Engineer - Teachable

2016 - 2019

- Rebuilt company website as a content management system so employees could manage site without the help of engineers, increasing speed and efficiency of marketing operations
 - Built with Rails and React
 - Utilizes Bootstrap to be fully responsive
 - Test suite built with RSpec, Cucumber, and Capybara
- Hired and led a small team of engineers to improve and maintain website codebase
 - Created assignment for candidates to complete as part of interview process
 - Onboarded and mentored new engineers, led performance reviews

Side Projects

Films Manager

github

Rails app for managing all aspects of a film distribution business

- Manages film rights, licensors, bookings, invoices, sublicensors, and DVD fulfillment
- Generates PDF sales catalogs
- Calculates, generates, and sends quarterly royalty reports
- Exposes API with data for ingestion by company website
- Currently being used by Film Movement (filmmovement.com)

Jarvis

github

Music player on Raspberry Pi

- Built with Flask and React, uses Omxplayer to play music
- Uses Redis to store process IDs to stop music when necessary

Socket Bot

live · github

Platform browser game built with HTML Canvas

- Uses HTML5 Canvas for pixel control, creating a detailed gameplay environment
- Leverages object-oriented design, using inheritance to achieve DRY code
- Transpiled into ES5 with Babel and Webpack for maximum browser support

Education

App Academy

2016

- 1000 hour full stack web development bootcamp with less than 3% acceptance rate
- Selected as a top student in cohort to work as a TA for incoming students

New York University

2002 - 2006

- BFA in Film & Television from Tisch School of the Arts
